

TELL US YOUR STORY!

Please share your experience so that we may spread the word about your success and how you beat infertility!

When we 1st wanted to start "trying" I went off birth control. When my period didn't show up I consulted my OBGYN who tried clomid (3 rounds). I then visited a fertility doctor & went through 3 IUIs. With no success & a doctor that had terrible bedside manner, my husband & I decided to check out Dr. A. This was the best decision. From our consultation I truly felt he cared & that we were in this together. We tried 1 on IUI & with no success moved to IVF. We got pregnant w/ Brynn on the first round! About a year later we did a frozen transfer w/ no success. We then did a fresh cycle & I got pregnant with our daughter please Dr. A & his staff have been amazing to us & we are so grateful for the time & attention they gave us. In this type of medicine you want to feel taken care of.
